

LOPREST WATER TREATMENT

LABORATORY SERVICES PRICE LIST

<u>Strong acid cation</u>	<u>\$150.00</u>
<u>Weak acid cation</u>	<u>\$190.00</u>
<u>Strong or weak base anion</u>	<u>\$255.00</u>
<u>Mixed bed</u>	<u>\$510.00</u>
<u>Regenerated strong acid cation</u>	<u>\$265.00</u>
<u>Regenerated weak acid cation</u>	<u>\$335.00</u>
<u>Regenerated strong or weak base anion</u>	<u>\$395.00</u>
<u>Regenerated mixed bed SA/SB components</u>	<u>\$770.00</u>
<u>Cation Stratabed</u>	<u>\$456.00</u>
<u>Anion Stratabed</u>	<u>\$660.00</u>
<u>Water Analysis</u>	<u>\$335.00</u>
<u>TOC Testing Partial Analysis</u>	<u>\$154.00</u>

Rush resin testing (2-3 days turnaround time)
Call for Pricing 50% Mark-up

Volumetric Capacity Moisture Content Visual Examination Report Including:
Separation & Percent of Components (Mixed Bed & Stratabed) Site Composition (Regenerated Resins) Photo (upon request)
Physical/Chemical Characteristics, Assessment of resins overall conditions, Recommendations for cleaning (when applicable)

Fill out the attached resin sample for analysis form completely. Send the completed form and an ample amount of each sample to the lab's attention at the address below. Providing detailed information regarding each sample will aid in our ability to service your specific needs quicker and more efficiently. An ample amount of each sample (16 oz./500 ml) will provide us with enough resin to obtain larger sample volumes for increased accuracy, as well as the ability to perform several analyses simultaneously, thus providing a more timely completion date.
